

3. A non-professional is providing skin care with a Prevention Plan in place, the caregiver is checking all pressure points, and there is no reported skin problem. The HCS/AAA/DDD Social Worker/Nurse or other contracted nursing resources must:
- A. Verify with _____ [caregiver name] that he/she is observing all pressure points. The caregiver is observing all pressure points _____ [insert frequency or times when pressure points are being observed].
 - B. Verify with the client and/or _____ [caregiver name] that the prevention plans are meeting the client's needs.
 - C. The client and/or _____ [caregiver name] are receiving/providing prevention plans for _____ [insert prevention plans currently in place for Bed Mobility, Bathing, or Toileting].
 - C. The client and/or _____ [caregiver name] were shown the photographs and descriptions of pressure ulcers and (denied) the presence of any skin changes. (If the client confirms one or more of the pressure ulcer stages present, the case manager must arrange for a Skin Observation visit).

Educational Materials provided to the client and/or caregiver included:

Circle or insert all materials that were provided and/or reviewed, for example:

- Maintaining Healthy Skin Part 1
- Maintaining Healthy Skin Part 2
- Taking Care of Pressure Sores
- Fundamentals of Caregiving Skin and Body Care modules
- CARE Prevention Plans (Bed Mobility; Bathing; Toileting
- Diagram of Pressure Points).

Recommend that the care plan be revised to include the following care needs:
